PROFILE SUMMARY

DevOps Engineer with hands-on experience in CI/CD pipeline automation, containerization, Kubernetes orchestration, and cloud infrastructure provisioning. Skilled in AWS, Jenkins, Docker, Terraform, and Kubernetes with strong Linux and Bash scripting expertise. Reduced deployment time from 30 minutes to 5 minutes by implementing automated CI/CD pipelines. Focused on building scalable, reliable, and automated cloud native systems.

TECHNICAL SKILLS

Cloud Platform: AWS (EC2, S3, IAM, Security Groups)
CI/CD Tools: Jenkins (Freestyle Jobs, Declarative Pipelines)
Containers & Orchestration: Docker, Kubernetes (Pods, Deployments, Services, Kubectl)
Infrastructure as Code (IaC): Terraform (Provisioning, State Management)
Version Control: Git, GitHub (Branching, Merging, Webhooks)
Scripting Languages: Bash
Operating System: Linux
Concepts: CI/CD, SDLC, Automation, Cloud Deployment, Infrastructure Provisioning

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern
MyWebRide | Thane, Maharashtra *Dec 2025 – mar 2026*

- Designed and implemented CI/CD pipelines using Jenkins, automating build and deployment workflows and reducing manual effort by 70%
- Containerized applications with Docker and built end-to-end deployment automation from code commit to production, improving consistency and release reliability
- Provisioned and managed AWS infrastructure (EC2, S3, IAM) using Terraform and developed Bash scripts to enable scalable, repeatable deployments and reduce configuration errors.

Web Developer Intern
SQBE Infotech | Thane, Maharashtra *May 2019 – Jun 2019*

- Developed responsive web applications using HTML5 and PHP
- Implemented backend logic for data processing and form handling
- Utilized Git for version control, improving code management and collaboration

PROJECTS

End-to-End DevOps Automation Project

- Built and automated CI/CD pipeline using Jenkins for application build, testing, and deployment, reducing manual effort by 80%
- Integrated Docker for containerization and implemented Git-based workflows to enable consistent environments and continuous integration
- Automated AWS infrastructure provisioning using Terraform, reducing setup time from hours to <10 minutes.

Face Recognition Attendance System

- Developed a Python-based attendance system using OpenCV, NumPy, and Pandas
- Implemented face detection and recognition for automated tracking
- Collaborated in a team to design, test, and deploy the solution

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science (AI & ML)
Theem College of Engineering, Palghar *2022 – 2025*

Diploma in Computer Engineering
Pravin Patil Polytechnic, Thane *2018 – 2021*
